On September 18, 1895, D.D. Palmer was working in his office when Harvey Lillard entered. Lillard had been deaf for 17 years following an injury to his spine. Upon examining him, D.D. Palmer found a hard lump near his spine that appeared to be a vertebrae out of alignment. Placing his hands over the spine, Dr. Palmer moved the bone into better alignment. According to Palmer's report, Lillard got off the table and exclaimed "Dr. Palmer, I can hear the wagon wheels on the cobblestones of the street!" Three days later Lillard's hearing was fully restored. Palmer had discovered a unique principle of health he later named chiropractic.

Our purpose is to educate and adjust as many families as possible toward Optimal health through natural Chiropractic Care. Today chiropractic is becoming the number one choice in restoring and maintaining optimal health.

In celebration of the birthday of chiropractic, please give this birthday card to someone who is in need of an optimally functioning spine and nervous system.
